

HACK CLUB

# Daydream

Washington DC

## SPONSOR PROSPECTUS

# WHAT IS DAYDREAM?

Hi there!

This September, our team of local high schoolers is getting together to organize **Daydream DC**, a hackathon that gathers **40 passionate teens** for a 24-hour coding marathon full of creativity, innovation, and fun!

Daydream is part of a global initiative by **Hack Club**, a 501(c)(3) nonprofit that has **empowered over 45,000 teens** through computer science clubs and events.

We want to give local teens the opportunity to discover a love of tech and make connections, and **we need your help to do it.**

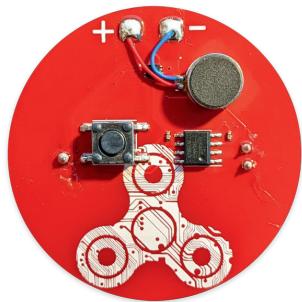

# OUR MISSION

Our mission is to inspire the next generation of makers worldwide by introducing them to electronics and programming in a fun, collaborative environment.

During Daydream, they'll work in teams to build projects and advance their creativity, collaboration, and innovation skills. For Hack Club, hacking means problem-solving, innovating, and creating incredible projects and friendships. The Hack Club community is made up of coders, makers, and artists brought together through their shared passion for creating. Hackathons connect creators: we would never have been inspired to run an event like this without other people doing it before us, and we hope to inspire people to keep running more hackathons in the future!

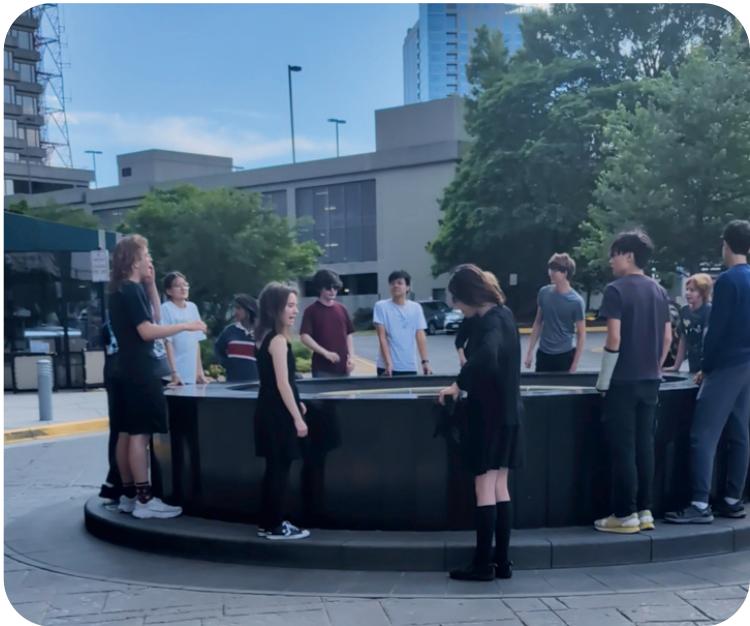

MICHA, 16, MADE A FIDGET SPINNER WITH NO MOVING PARTS!

KARMANYAAH BUILT AN LED DIGITAL LEVELER!

As an active center for innovation and research, Washington DC is a perfect location for our event. By supporting local high schoolers through hackathons, we aim to open their eyes to nearby opportunities and foster the next generation of innovators in the region.

Through your backing, you help us further our mission. **We can't run this event without you.**

# INTERESTED IN CONTRIBUTING?

We can't thank you enough for your interest in sponsoring this event! Below are some suggested packages and perks (more details available upon inquiry). We're always happy to discuss custom deals!

Since we're a 501(c)(3) nonprofit fiscally sponsored by The Hack Foundation (EIN: 81-2908499), your contributions will also be eligible to be fully tax-deductible!

# INTERESTED IN HOSTING US?

Thank you so much for your generosity! To ensure this event is a success, we've outlined some points of discussion to ensure we set up well in your venue.

**Date & Time:** Morning of Saturday, September 27 to early afternoon of Sunday, September 28. Unfortunately, we can't be flexible with these dates because our event has to be concurrent with others around the world.

**Demographic:** High school students (almost all <18) who are excited to code! We're expecting around 40 attendees.

**Budget:** Though our limited budget prevents us from paying for your space, we consider it a very generous donation, and we can negotiate sponsorship perks accordingly! We will also pay any cleaning fees required.

**Food:** We plan on catering food and purchasing snacks, but we will require running drinkable water.

**Hygiene:** We'll need bathrooms!

**Noise:** Akin to an active classroom: background music and bursts of excitement between chatter amongst friends.

**Rooms:** Ideally, hackathons have:

- Large space for opening and closing ceremonies
- Breakout rooms for workshops
- Closed space for setting up sleeping bags
- Assorted areas for general work and play

We can make almost any environment work, though!

**Supervision:** We will have background-checked adults supervising throughout the entire event duration. We will make sure attendees are behaving and being respectful of the space. All Hack Clubbers also are required to follow our Code of Conduct.

**Security:** We'd love to allow attendees to enter & exit at designated times in the event for fun outdoor activities we plan on organizing, provided their parents have signed the appropriate waiver! Aside from official activities, attendees would be forbidden from leaving the premises save for serious circumstances, pending parental permission.

**Technology:** We'll need some amount of internet (we can bring our own router), and sufficient electricity and power outlets to support 25+ plugged-in electronics (>5 outlets). Built-in AV equipment (projectors, microphones, speakers, etc.) would also be appreciated if possible!

If there's anything else we may have overlooked, please bring it up in our emails/call(s)! We aim to have full clarity on what this event entails so it can be a success for everyone.

# THANK YOU!
